

CLAIMS

1. A fuel assembly (1, 21) for a pressurized water nuclear reactor, the assembly comprising first nuclear fuel rods (15) having a first content by weight of gadolinium, and second nuclear fuel rods (17) having a second content by weight of gadolinium, the second content being greater than the first content, the assembly being characterized in that the first content by weight is strictly greater than 2%.

2. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 2.1%.

3. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 2.2%.

4. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 2.5%.

5. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 3%.

6. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 4%.

7. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 5%.

8. An assembly according to claim 1, characterized in that the first content by weight is greater than or equal to 8%.
